IMPLEMENTATION PROCEDURES TO THE AGREEMENT ENAC-HCAA (AΠA)

Article 1 - PURPOSE

The purpose of this document is to provide detailed working arrangements between the Hellenic Civil Aviation Authority (HCAA) of Greece and the Ente Nazionale per l'Aviazione Civile (ENAC) of Italy to implement the Agreement ENAC-HCAA (AΠA) for the transfer of certain functions, duties and surveillance responsibilities (operations, maintenance and continuing airworthiness) for aircraft operated under dry leasing contracts or by virtue of ownership of the concerned aircraft or any other agreement in the spirit of article 83bis of the Convention on International Civil Aviation. They allow them to discharge their legal responsibilities for the surveillance of operations, personnel and continuing airworthiness of aircraft to be operated in commercial operations while avoiding undue burden by elimination of duplication of tasks. As an example, cross reference tables to identify competent authority in respect of Part-M and ICAO duties and responsibilities as resulting from duties and responsibilities transferred from Authority of the State of Registry to the Authority of the State of operator according to article 3 of the ENAC-HCAA(AΠA) Agreement above mentioned are reported in Appendix B and Appendix C.

Article 2 - APPLICABLE RULES AND REGULATIONS

Any European Union (EU) Regulation (i.e. Regulation of the European Parliament and of the Council or of European Commission) or EASA measures this agreement, directly or indirectly, refers to, is to be applied, according to the pertinent effectiveness schedule, at the latest amendment/change as published in the Official Journal of the European Communities or EASA website respectively (ref. ED Decision 2003/8/RM) effective at the date at which the specific regulation or measure needs to be complied with or referred to for fulfilling the terms and conditions of this agreement. Should the operator Authority grant exemptions under the provisions of art 71 of the Regulation (EU) No 2018/1139 of the European Parliament and of the Council, these exemptions shall be notified to the State of registry Authority as soon as possible, unless explicitly otherwise established elsewhere in this agreement. Any set of requirements, directly or indirectly called for in this agreement, to be referred to for ensuring compliance with the terms and conditions of this agreement shall be those at the latest amendment/change published by the operator Authority.

In respect of any certification activity or oversight responsibility related to EU regulations for which the operator Authority is considered to be Competent Authority, the operator authority may adopt

Revision n° 0	15 June 2022	Page 4
---------------	--------------	--------

IMPLEMENTATION PROCEDURES TO THE AGREEMENT ENAC-HCAA (ΑΠΑ)

or accept to the operator alternative means of compliance to EU regulations other than those published by EASA when satisfied that above material shows compliance with the concerned EU Regulation.

Article 3 - IMPLEMENTATION

For the implementation of the Agreement, the points of contact of the Authorities are the following for all questions regarding airworthiness, major changes and matters of principle:

ENAC - Ente Nazionale per l'Aviazione Civile	HCCA – Hellenic Civil Aviation Authority
Direzione Navigabilità e Operazioni <i>Via Gaeta, 3</i> 00185 - ROMA ITALY Tel. +39-0644596724 Fax +39-0644596611 e.mail: navigabilitacontinua.operazioni@enac.gov.it	Flight Standards Division 580A Leoforos Vouliagmenis Argiroupoli Zip Code 164 52 Athens Greece Tel: +30 210 9973551 Email: a2.director@hcaa.gov.gr

As far as the current activities to be performed in accordance with these procedures are concerned, HCAA inspectors in charge of a specific Greek registered aircraft or operator and the ENAC structures in charge of a specific Italian operator or Italian registered aircraft, will co-ordinate their specific intervention and the necessary exchange of information related to the present procedures. References of State of registry and State of operator Authority Services in charge of daily implementation of these procedures are provided in the initiation and acceptance letters for each concerned aircraft to which the agreement ENAC – HCAA applies. In Appendix A, references of ENAC and HCAA regional offices or Central Departments in charge of topics specified in the present agreement are listed.

Article 4 - TYPE DESIGN DEFINITION

The aircraft and any product or part thereof must conform to the relevant EASA approved type design (refer to provisions of relevant articles of the cover regulation of the EU Regulation 748/2012).

Revision n° 0	15 June 2022	Page 5
---------------	--------------	--------

IMPLEMENTATION PROCEDURES TO THE AGREEMENT ENAC-HCAA (AIIA)

The Authority of the State of operator will be responsible for supervising that the aircraft operator ensures continuous compliance with this requirement after delivery over the whole period of time the aircraft is being operated by the national operator under the foreign State's registration marks.

The Authority of the State of Registry and of the State of operator shall ensure that mutual exchange of relevant information among them on the concerned aircraft, as and when necessary, take place in accordance with Part M requirements (M.B.105 and relevant AMC material) and with specific requirements of other Annexes to EU Regulation 1321/2014, according to the relevant ultimate application provisions therein established, relevant to the scope of this agreement (e.g. CAMO.B.200(c)), at the delivery of the aircraft to the operator and at the delivery of the aircraft back to the lessor.

Article 5 - CHANGES TO TYPE DESIGN

The express permission of the aircraft registered owner is required prior to the incorporation of any modification unless it is mandated by any MCAI, by Regulations (including modification requested as a result of approved reliability program or of any periodic review of effectiveness of the approved maintenance programme) , by EASA or by any concerned counterpart Authority.

- a) The classification of major or minor changes to Type Design are defined in the part 21 paragraph 21.A.91 of EU Regulation 748/2012.

Changes to Type Design are classified as major or minor by entitled entity to conduct technical investigations in accordance with part 21 paragraph 21.A.95 and 21.A.97 of EU Regulation 748/2012 and approved in accordance with the following procedure.

Changes or Supplemental Type Certificates may be embodied on the aircraft once they are in compliance with the Annex I (Part-21) to Regulation (EU) No 748/2012 (i.e. approved by EASA directly, through the Design Organisation Approval (DOA) system) or otherwise recognised or accepted in accordance with published EASA measures (e.g. refer to Executive Director Decision 2004/04/CF/ EASA/FAA Technical Implementing Procedures or applicable Certification Specifications) or a Bilateral Airworthiness Safety Agreement signed by a third

Revision n° 0	15 June 2022	Page 6
---------------	--------------	--------

IMPLEMENTATION PROCEDURES TO THE AGREEMENT ENAC-HCAA (AIIA)

Country with EU Commission, and associated Technical Implementation Procedures. A copy of a specific EASA approval, when requested in accordance to the Annex I (Part-21) to Regulation (EU) No 748/2012, will be forwarded by the operator to the State of registry Authority.

The State of the operator Authority shall ensure that the operator has in force adequate procedures to embody the changes to type design on the concerned aircraft in accordance with the above provisions and requirements.

- b) Approved changes to the aircraft will be performed in accordance with "Article 10 - MAINTENANCE"

Article 6 - APPROVAL OF SERVICE BULLETINS

The technical instructions and engineering contents of any Service Bulletin issued by the Type Design certificate holder (TDCH) can be used by the operator on the concerned aircraft once evidence of their approval by the State of Design Authority or by the TDCH under the Authority of a DOA approval issued under EU Regulation 748/2012 Part 21 (as amended) is available.

Any design implication of those documents has to be approved in accordance with the procedure established in Article 5 above.

Embodiment of Service Bulletins on aircraft will be performed in accordance with "Article 10 - MAINTENANCE".

Article 7 - CONFORMITY TO OPERATIONAL REQUIREMENTS

Aircraft to which this agreement applies have to be equipped in accordance with the operational requirements established by the State of the operator for the intended type of operations.

Conformity to national operational requirements, including those which may have an impact on aircraft design (e.g. additional airworthiness requirements for operations), will remain within the responsibility of the operator's Authority.

Revision n° 0	15 June 2022	Page 7
---------------	--------------	--------

IMPLEMENTATION PROCEDURES TO THE AGREEMENT ENAC-HCAA (ΑΠΑ)

Design data related to the modification have to be approved in accordance with the procedure established in Article 5 above.

The aircraft must be operated within the limitations described in the Aircraft Flight Manual approved by EASA, or deemed as EASA approved under (EU) 748/2012 Regulation in accordance with EASA procedures. The Aircraft Flight Manual may include amendments approved in accordance with EASA procedures relevant to equipment required by operational regulations of the State of the operator.

Article 8 - CONTINUING AIRWORTHINESS

In accordance with ICAO Annex 8, the State of design will inform the Authority of the State of registry of all actions made mandatory in order to ensure continued airworthiness of the aircraft. The Authority of the State of registry shall adopt, or assess and take appropriate corrective action, the mandatory airworthiness information issued by the State of design Authority. The State of registry Authority may issue and make mandatory other airworthiness actions, in addition to those mentioned before, should it identify an unsafe condition affecting aircraft of the same type in its national fleet which requires an immediate reaction.

Pursuant to the above, the EU Regulations 2018/1139 and 748/2012, and the Decision No. 2019/018/ED of the Executive Director of the Agency dated 3 June 2019 (or latest published issue), the aircraft must be in compliance with all the Mandatory Continuing Airworthiness Information (MCAI), such as Airworthiness Directives (AD), etc applicable to that aircraft and to any components/parts thereof mandated either by EASA, the relevant State of design Authorities, unless EASA has issued a different decision before the date of entry into force of that MCAI, or by the State of registry Authority under the provisions of article 70 of Regulation (EU) No 2018/1139 of the European Parliament and of the Council of 4 July 2018. To this late regard, the State of registry Authority will timely provide the operator and the regional office of the State of the operator Authority in charge of aircraft surveillance with the above ADs and other airworthiness action mandated by the State of registry Authority (MCAI) for the aircraft type concerned and parts/products thereof. The operator must hold and keep up-to-date a complete set of the above mentioned applicable MCAI.

Revision n° 0	15 June 2022	Page 8
---------------	--------------	--------

IMPLEMENTATION PROCEDURES TO THE AGREEMENT ENAC-HCAA (AIIA)

The Authority of the State of the operator will also require that the concerned aircraft complies with MCAI applicable to the subject aircraft model or parts/products thereof issued by the State of the operator Authority under the provisions of article 70 of Regulation (EU) No 2018/1139 of the European Parliament and of the Council when an unsafe condition affecting aircraft of the same type has been identified which requires an immediate reaction and an equivalent airworthiness action has not been made mandatory by EASA or the State of design Authorities. In this regard, design or maintenance programme implications deriving from the above-mentioned mandatory airworthiness actions will be treated in accordance with the terms and conditions of the appropriate Articles of this agreement.

Any derogation from MCAI requirements must be approved in accordance with EASA regulations and procedures. The State of registry Authority shall inform the operator if article 71 of Regulation (EU) No 2018/1139 is applied.

The operator Authority shall verify that the operator, according to applicable regulations, is in receipt of, has available or has access to all the ADs or other mandatory airworthiness actions applicable to the concerned aircraft and products, components or parts thereof.

The Authority of the State of operator will be responsible to supervise that all ADs and other mandatory continuing airworthiness actions applicable to the aircraft are complied with by the operator. All mandatory continuing airworthiness information issued by HCAA are available on the website (www.hcaa.gov.gr). ENAC AD's, as well as any other mandatory continuing airworthiness information are only made available on the ENAC website (<http://www.enac.gov.it>). Therefore, the operator is requested to regularly look at those sites as applicable to absolve their continuing airworthiness responsibilities in respect of this aspect. The operator is also requested to regularly look at EASA and other relevant State of Design Authority web sites to absolve their continuing airworthiness responsibilities in respect of the concerned aircraft and their components

Significant in-service events with the aircraft shall be reported, written in the English language, by the operator to its Authority in accordance with Regulation (EU) No 376/2014 *on the reporting, analysis and follow-up of occurrences in civil aviation, amending Regulation (EU) No 996/2010 of the European Parliament and of the Council and repealing Directive 2003/42/EC of the European Parliament and of the Council and Commission Regulations (EC) No 1321/2007 and (EC) No 1330/2007*.

Revision n° 0	15 June 2022	Page 9
---------------	--------------	--------

IMPLEMENTATION PROCEDURES TO THE AGREEMENT ENAC-HCAA (AIIA)

The Authority of the State of the operator is responsible for defining which service information is to be reported by the operator (lessee) under the national occurrence reporting system. The HCAA occurrence reporting portal ECCAIRS 2 and the ENAC ECCAIRS 2 (or eE-MOR as applicable) reporting system, to be interfaced as described in <https://reporting.enac.gov.it/eemor-4103/index.php>, describe respectively the type of in-service information to be reported under the Hellenic and the Italian regulatory system and relevant reporting times. EASA Occurrence reporting portal shall be used as well when required by EU regulation. For delegated aircraft registered in Greece, accidents and incidents shall be reported to HCAA and Greek AAIASB and for delegated aircraft registered in Italy, accidents and incidents shall be reported to the ENAC Direzione Operazioni (TXX) in charge of a specific concerned Italian registered aircraft and to the Agenzia Nazionale per la Sicurezza del Volo (ANSV), as soon as possible, but in any case no later than time constraints mandated by applicable occurrence reporting, operational and continuing airworthiness requirements and in particular with the quickest means available in case of any accident or serious incident.

The Authority of the State of operator will supervise that a copy of reports on significant events that affect or could affect the continuing airworthiness of concerned aircraft or invalidate their Certificate of Airworthiness/related Airworthiness Review Certificate is also forwarded by the operator to the Authority of the State of registry in order to allow proper corrective actions. In such cases the Authority of the State of registry will accept that the Authority of the State of the operator is entitled to prevent the aircraft from resuming flight operations on the condition that the State of the operator Authority appropriately will advise the State of registry Authority to allow adequate actions be taken. Authorisations to resume flights to permit the aircraft to be flown to an approved maintenance facility at which it will be restored to an airworthy condition shall be released in accordance with Article 12 below.

The Authority of the State of operator shall supervise that the operator ensures transmission of information on significant events affecting continuing airworthiness of a concerned aircraft to the organisation responsible for the type design (refer to above mentioned provisions related to occurrence reporting Regulations, the ENAC ECCAIRS 2 (or eE-MOR as applicable) to be interfaced as described in <https://reporting.enac.gov.it/eemor-4103/index.php> and the HCAA <https://aviationreporting.eu> (information on safety@hcaa.gov.gr).

IMPLEMENTATION PROCEDURES TO THE AGREEMENT ENAC-HCAA (AIIA)

The Authority of the State of operator shall ensure the transmission of information on significant events to the Authority of the State of Design and EASA. The follow-up of any reported occurrence that affects or could affect the continuing airworthiness of concerned aircraft by the Authority of the State of Design progressing to satisfactory closure shall be monitored by the Authority of the State of operator in co-ordination with EASA.

The Authority of the State of operator and of the State of registry will ensure a timely mutual exchange of information on any result arising from the follow-up investigation phases of significant in service events in respect of concerned aircraft.

The Authority of the State of operator will supervise that the operator obtains and assesses information for continued airworthiness and recommendations available from the type design organisations and implements resulting actions considered necessary by the State of the operator Authority and the Authority of the State of Registry.

The Authority of the State of operator will supervise that the operator monitors and assesses maintenance and operational experience with respect to continuing airworthiness, flight safety and accident prevention. Relevant procedures shall be described in the operator's Operations Manual (OM), and Continuing Airworthiness Maintenance Exposition (CAME).

The Authority of the State of Operator, when applicable and requested, shall approve the Maintenance Programme of the aircraft as well as any revisions and deviations hereto in accordance with Part M provisions.

The Authority of the State of operator shall supervise that the operator is appropriately approved, pursuant to Annex Vc (Part CAMO) to Regulation (EU) 1321/2014 as revised for the management of the continuing airworthiness of the aircraft it operates, including any dry leased aircraft which this arrangement applies to.

IMPLEMENTATION PROCEDURES TO THE AGREEMENT ENAC-HCAA (ΑΠΑ)

Article 9 - REPAIRS

- a) The classification of major or minor repairs shall be made in accordance with the criteria of Part 21 paragraph 21.A.91 of EU Regulation 748/2012 for a change in type design (rif. 21.A.435(a))

Repairs are classified as major or minor in accordance with Part 21 paragraph 21.A.435 of EU Regulation 748/2012 as amended. Repairs shall be in compliance with the Annex I (Part-21) to Regulation (EU) No 748/2012 (i.e. approved in accordance with Part 21 paragraph 21.A.437 of EU Regulation 748/2012 as amended) or otherwise recognised or accepted in accordance with published EASA measures (e.g. in accordance with Executive Director Decision 2004/04/CF (for US TC Holders) or applicable Certification Specifications) or a Bilateral Airworthiness Safety Agreement signed by a third Country with EU Commission, and associated Technical Implementation Procedures. A copy of a specific EASA approval, when requested in accordance to the Annex I (Part-21) to Regulation (EU) No 748/2012, will be forwarded by the operator to the Authority of the State of Registry.

The Authority of the State of the operator shall supervise that the operator has in force procedures to accomplish any repairs on the concerned aircraft in accordance with the above provisions and requirements.

- b) The accomplishment of approved repairs on the aircraft will be performed in accordance with "Article 10 - MAINTENANCE".

Article 10 - MAINTENANCE

The Authority of the State of the operator shall supervise that the operator's Continuing Airworthiness Management Exposition (CAME) and the applicable operator Aircraft Maintenance Programme comply with the requirements of the Authorities of the State of registry and the State of the operator as specified and laid down in these Implementation Procedures.

The Authority of the State of operator shall approve the operator's CAME and any revision thereof, or deems them as approved, as applicable in accordance with relevant Part-M, Part-CAMO of Regulation (EU) 1321/2014 requirements. The Authority of the State of operator shall supervise

Revision n° 0	15 June 2022	Page 12
---------------	--------------	---------

IMPLEMENTATION PROCEDURES TO THE AGREEMENT ENAC-HCAA (ΑΠΑ)

that a copy of approved CAME is sent by the operator to the Authority of the State of Registry upon their request.

(a) Continuing Airworthiness

A concerned aircraft, its engines and its equipment, will be maintained in accordance with the maintenance programme:

1. established by the operator in accordance with relevant requirements of Annex I (Part-M) of EU Regulation 1321/2014, as revised, and
2. approved, as applicable, in accordance with relevant requirements of Annex I (Part-M) of EU Regulation 1321/2014 (M.A.302 and M.B.301 provisions), as revised, including the use of indirect approval procedure.

Any variation (e.g. interval escalations, changes to the content and classification or the deletion of maintenance tasks etc) to the aircraft maintenance programme shall be managed and approved by the Authority of the State of operator when required and applicable, in accordance with relevant requirements of Annex I (Part-M) of EU Regulation 1321/2014, as revised. Operational equipments will be maintained in accordance with maintenance specifications of the Authority of the State of the operator, if the equipment manufacturer/design holder maintenance documentation gives such an opportunity (e.g. TCH maintenance documentation requirements report "as requested by national rules/NAA") or does not provide for any maintenance requirements. In lack of maintenance specifications by the Authority of the State of the operator, the requirements of the State of registry Authority, if any and once notified by the Authority of the State of Registry, will apply.

Where a reliability programme forms part of, or is a condition within the maintenance schedule developed in accordance with relevant EU Regulation 1321/2014, the Authority of the State of operator will monitor the effectiveness of such a programme. The operator shall provide a copy of the aircraft reliability reports periodically to the Authority of the State of registry.

Due consideration, especially for dry lease agreements of six months or less, will be made by the Authority of the State of operator to validate the maintenance programme previously in use with lessor under oversight of the Authority of the State of Registry, taking also into account the additional burden on the operator and technical aspects related to the return of the aircraft to the owner. Surveillance of aircraft maintenance will be performed by the Authority of the State of

Revision n° 0	15 June 2022	Page 13
---------------	--------------	---------

IMPLEMENTATION PROCEDURES TO THE AGREEMENT ENAC-HCAA (ΑΠΑ)

operator in accordance with its standard procedures developed in accordance with relevant Part M requirements of EU Regulation 1321/2014.

(b) Performance of Maintenance

All maintenance inspections, overhauls, modifications and repairs to be performed on the aircraft shall be carried out and released by any appropriately rated Maintenance Organisation (MO) approved/accepted under the applicable provisions of EU regulation 1321/2014, as revised, as requested in accordance with Part M provisions, taking into account aircraft classification or type of operations.

Maintenance and airworthiness records will be kept by the aircraft operator in accordance with procedures approved by the Authority of the State of operator. The records will be transferred by the operator to the lessor at the end of the leasing period.

Maintenance work must be accomplished by personnel licensed by, or qualified within the maintenance organisation in accordance with standards acceptable to, the operator Authority.

Aircraft or components will be released to service as applicable by personnel licensed in accordance with the Annex III (Part 66) of EU Regulation 1321/2014 or, when applicable, the regulations of the State of the operator Authority pursuant to the applicable EU Regulation 1321/2014 provisions.

Article 11 - RECORDS

The Authority of the State of registry shall ensure that all the maintenance and in service records and documentation relevant to the concerned aircraft are transferred or made available and/or accessible to the operator at the time of aircraft delivery to allow complete and accurate selection of the information judged necessary to manage the continued airworthiness of the aircraft all through the duration of this agreement in respect of the specific aircraft.

The aircraft continuing airworthiness record system of the operator shall comply with the relevant requirements of EU regulation 1321/2014, as applicable taking into account aircraft classification or type of operations.

Revision n° 0	15 June 2022	Page 14
---------------	--------------	---------

IMPLEMENTATION PROCEDURES TO THE AGREEMENT ENAC-HCAA (ΑΠΙΑ)

The aircraft operations record system of the operator shall comply also with the relevant EU Air Operation Regulations requirements, as applicable in respect of the lease aircraft taking into account aircraft classification or type of operations.

The Authority of the State of operator shall supervise that the operator makes available all the aircraft maintenance records to the lessor and the Authority of the State of Registry at the end of the leasing period. Additionally the Authority of the State of operator shall ensure that operator shall make available these records, as applicable, to the contracted appropriately approved organisation with appropriate privileges, or to the Authority of the State of Registry (or otherwise agreed by the Parties of this agreement as per applicable EU regulation 1321/2014 provisions), for carrying out periodic aircraft airworthiness review for issuing or, when applicable, recommending the issuance of the Airworthiness Review Certificate associated with Certificate of Airworthiness (CofA) of each aircraft to which the present agreement applies to.

The Authorities will supervise that, at the time of aircraft transfer, the presentation of these records is arranged looking at the indications and bearing in mind the principles laid down in Appendix A Part V of ICAO Doc. 9760 "Airworthiness Manual".

In the course of the activities leading to the approval of the lease agreement or to the extension of this agreement in respect of specific aircraft and preceding the aircraft delivery to the operator, the HCAA and ENAC inspectors in charge, in conjunction with their respective senior management, with the assistance of the lessor and the operator, will co-operate to guarantee that the maintenance records and documentation used for the issuance of the aircraft Certificate of Airworthiness by the Authority of the State of Registry are those made available to the operator for ensuring the continuing airworthiness of the aircraft during the validity period of this agreement in respect of a specific aircraft.

Article 12 - FLIGHT OPERATIONS AND AUTHORISATION

The Authority of the State of operator shall be responsible for the authorisation of all operations in respect of a concerned aircraft according to applicable EU operational requirements in respect of aircraft type of operation or aircraft classification taking into account relevant applicable acceptable means of compliance and guidance material (AMC/GM/IEM, or as applicable relevant

Revision n° 0	15 June 2022	Page 15
---------------	--------------	---------

IMPLEMENTATION PROCEDURES TO THE AGREEMENT ENAC-HCAA (AIIA)

implementation Circulars/regulations). Above operations shall be conducted in accordance with the EASA approved Aircraft Flight Manual, or deemed as EASA approved under (EU) 748/2012 regulation, and the Authority of the State of operator approved Operations Manual (or equivalent document requested for the specific operations under State of operator national requirements). Modifications of the aircraft to comply with operational requirements shall be treated in accordance with Article 5 of these implementation procedures.

The Minimum Equipment List (MEL) and any amendments thereto for each concerned aircraft shall be approved by the Authority of the State of operator and shall not be less restrictive than the relevant EASA approved Master Minimum Equipment List or deemed as EASA approved/accepted. If this does not exist, the use of an alternative MMEL (e.g. MMEL produced by the Type Certificate Holder and approved by the Authority of the State of Design, MMEL produced or approved by another EU Member State Authority or by FAA) is subject to agreement with operator's Authority. Any deviation from the approved MEL shall be evaluated and approved by the operator Authority according to its national procedures and taking into account prescriptions and guidelines on that issue published or notified by the EU Commission.

Permit to Fly in respect of the registered aircraft, where the aircraft is temporarily not in airworthy condition, shall be issued by the Authority of the State of Registry (or by other entities entitled under applicable EU Commission Regulations) upon application by the Permit to Fly holder (operator, etc.) in accordance with Annex I (Part 21) Commission Regulation (EU) 748/2012 as revised. Permit to Fly may prescribe particular limiting conditions to permit the aircraft to be flown without fare-paying passengers to an approved maintenance facility at which it will be restored to an airworthy condition (refer to Annex I (Part 21) Commission Regulation (EU) 748/2012 as revised). Such an approval may be issued for example for the following purposes: accomplishment of mandatory airworthiness requirements, airworthiness directives, aircraft repairs, etc. which require the aircraft to be flown to an approved maintenance facility. Flight conditions associated to Permit to Fly shall be approved in accordance with appropriate provisions of Annex I (Part 21) to Commission Regulation (EU) 748/2012 as amended. The Authority of the State of Registry shall notify any such approval at the earliest possible opportunity to the Authority of the State of the operator by providing a copy of the relevant approval documentation.

Revision n° 0	15 June 2022	Page 16
---------------	--------------	---------

IMPLEMENTATION PROCEDURES TO THE AGREEMENT ENAC-HCAA (ΑΠΑ)

Permit to Fly for the purpose of testing a concerned aircraft, where the Certificate of Airworthiness of the aircraft is not in force, in situations other than those mentioned before shall be issued by the State of Registry Authority.

Operation of the aircraft conducted under the operator's AOC or under the relevant operator's authorization issued by the Competent Authority for operations other than air service, as defined in Article 2 of Regulation EC (No) 1008/2008 will be carried out in accordance with applicable EU rules – such as, but not limited to, Part-ORO.GEN.310, Part-SPO, Part-NCC and Part-NCO – and the rules and requirements of the State where the operations are conducted. Surveillance will be accomplished by the Authority of the State of the Operator in accordance with the current relevant national procedures.

Flight operations will be conducted by the operator employing flight crew members holding an appropriately rated license, issued, or validated, by the appropriate department of the operator Authority in accordance with EU regulations and validated by the State of Registry Authority as described here below:

1. If the pilots hold licenses issued in accordance with Regulation (EU) 1178/2011, they are able to operate concerned aircraft registered in the State of Registry under mutual recognition principle of EU Regulation 2018/1139.
2. If the pilots hold licenses other than Regulation (EU) 1178/2011 licenses, they will be required to obtain individual State of Registry Authority Certificate of Validation after meeting the validation requirements in Regulation (EU) 1178/2011.

In case of flying school operations, any flight training activities will be conducted with concerned aircraft, as necessary and required by regulations, under the supervision, responsibility and authorization of Flight Instructors employed by the operating training organisation holding licences issued in accordance with Regulation (EU) 1178/2011.

Concerned aircraft may be used by a flying training organisation (e.g. ATO /DTO) in accordance with Regulation (EU) 1178/2011 under the following conditions:

Revision n° 0	15 June 2022	Page 17
---------------	--------------	---------

IMPLEMENTATION PROCEDURES TO THE AGREEMENT ENAC-HCAA (ΑΠΑ)

- the aircraft must be integrated in the Regulation (EU) 1178/2011 flying training organization manuals and procedures
- all instructors and examiners using this aircraft must hold Regulation (EU) 1178/2011 licenses
- the continuing airworthiness of the aircraft shall continue to be managed by the CAMO of AOC operator, as and if necessary, under a contract laid down in accordance with Appendix I to Part-M signed among interested flight training organization and the CAMO of licensed air carrier/AOC operator itself

Any student pilot shall meet the requirements specified by the applicable regulations of the State of operator.

Article 13 - SURVEILLANCE AND INSPECTION

During the term of validity of this agreement in respect of a specific aircraft, the operator Authority shall accomplish surveillance activities and inspections in respect of the concerned aircraft and the operator (e.g. product audit selected by the Authority of the State of operator under surveillance plan of the operator's maintenance/continuing airworthiness/operational approvals, etc.) in accordance as applicable with EU regulation requirements and its current procedures in order to verify that aircraft operations are conducted in accordance with the applicable airworthiness standards, operational requirements and the terms and conditions specified in the present Implementation Procedures.

On the specific request of the State of Registry Authority and for reasonable causes, the operator Authority shall permit the State of Registry Authority to perform an inspection of the operator or the concerned aircraft (e.g. aircraft selected under the sample of the State of Registry Aircraft Continuing Airworthiness Monitoring Programme, etc.) and provide assistance in performing that inspection if requested, or may be requested by the State of Registry Authority to perform such an inspection.

Findings arising from the above inspection and surveillance activities shall be promptly processed by the relevant Authority according to relevant applicable requirements. Each Authority shall notify the other Authority of any finding or act which affects the validity status of any certificate or

Revision n° 0	15 June 2022	Page 18
---------------	--------------	---------

IMPLEMENTATION PROCEDURES TO THE AGREEMENT ENAC-HCAA (ΑΠΑ)

documentation issued in respect of the concerned aircraft or, when applicable, of the terms and conditions of the lease contract or the operator authorisation. As far as possible in relation to the level of finding, proper and timely co-ordination will be ensured among State of Registry and State of operator Authorities in order to allow each party to adopt as applicable proper actions in respect of above findings in accordance with relevant applicable requirements.

During the operation of the aircraft under the terms and conditions of this Agreement, the State Authority of the Operator and the Authority of the State of Registry agree that such aircraft will remain in the national fleet of aircraft of the State of Registry within which it can select aircraft to be included in the survey program (ACAM program) to be developed pursuant to requirement M.B.303 of Annex I (Part-M) of EU regulation 1321/2014. The Authority of the State of Registry shall keep informed the Authority of the State of Operator on any significant finding raised in connection with an ACAM inspection as well as on the relevant agreed and verified corrective actions established according to the relevant root cause analysis. However, with EASA concurrence, proper arrangements could be subsequently made between the two Authorities to decide on alternative procedures to allow aircraft under this agreement to be included under ACAM program established by the Authority of the State of Operator instead of that of the Authority of the State of Registry.

State of Registry and State of operator Authorities shall ensure that appropriate records relevant to inspection and surveillance they performed according to Part M and operational requirements and to this Arrangement is appropriately kept on file of each Authority as requested by Part-M and relevant operational requirements.

Article 14 - CONTINUED VALIDITY OF AIRCRAFT CERTIFICATES OF AIRWORTHINESS

The continued validity of the Certificate of Airworthiness of a concerned aircraft shall be ensured by the concerned operator in accordance with the relevant EU Regulation 1321/2014 Part M requirements.

Continuing Airworthiness Management Organisation (C.A.M.O.), appropriately privileged taking into account aircraft classification or type of operations, for carrying out airworthiness review and

Revision n° 0	15 June 2022	Page 19

IMPLEMENTATION PROCEDURES TO THE AGREEMENT ENAC-HCAA (AIIA)

issuing or recommending for issuance of ARC and approved / authorised in accordance with EU regulation 1321/2014, as revised, by any EASA Member State, may issue, extend, or make, when envisaged, recommendations to Authority of the State of Registry for the issuance of, the Airworthiness Review Certificate (ARC) of individual aircraft to which the provisions of the present Agreement apply when the relevant conditions as laid down in EU Regulation 1321/2014, Annex I (Part M) requirements occur. A copy of the ARC issued or extended by the concerned above mentioned appropriately privileged and approved entity shall be sent by that organisation to both State of Registry and State of Operator Authorities within 10 days since ARC issuance or extension. The operator shall monitor compliance with that provision.

When a recommendation for the issuance of the ARC is issued in accordance with EU regulation 1321/2014 Annex I (Part M) for the continued validity of the Certificate of Airworthiness of a concerned aircraft to which the present Agreement applies, that recommendation, along with all the associated documentation requested in accordance with pertinent EU regulation 1321/2014 Annex I (Part M) provisions (including copy of the relevant application), shall be sent to the Authority of the State of Registry (HCAA or Direzione Operazioni ENAC in charge of surveillance) by the issuing appropriately approved and privileged C.A.M.O.. The relevant application for the issuance of Airworthiness Review Certificate (ARC) shall be sent by the operator to the Authority of the State of Registry. When airworthiness review and recommendation for the issuance of ARC is contracted out to appropriately approved and privileged C.A.M.O. by operator, a copy of the issued recommendation, along with all the associated documentation requested in accordance with pertinent EU regulation 1321/2014 Annex I (Part M) provisions shall be also provided by the issuing C.A.M.O. to the operator to be kept by him in the continuing airworthiness records of the concerned aircraft.

When EU Regulation 1321/2014 conditions for the issuance of the ARC by the Competent Authority occur, aircraft airworthiness review shall be conducted and the relevant ARC be issued by Authority of the State of Registry in accordance with EU regulation 1321/2014 Annex I (Part M) requirements. A copy of the issued ARC shall be sent by Authority of the State of Registry to the Authority of the State of operator within 10 day since ARC issuance.

Findings found during analysis of ARC issued, ARC issuance recommendation or performing airworthiness review shall be promptly processed by the Authority of the State of Registry

IMPLEMENTATION PROCEDURES TO THE AGREEMENT ENAC-HCAA (ATIA)

according to EU Regulation 1321/2014 Annex I (Part M) requirements and notified to Authority of the State of operator in order to be taken into account in the Authority of the State of operator as necessary. As far as possible in relation to the level of finding, proper and timely co-ordination will be ensured among State of Registry and State of Operator Authorities in order to allow each party to adopt as applicable proper actions in respect of above findings in accordance with EU Regulation 1321/2014 Annex I (Part M) requirements.

However, on a case-by-case basis and with EASA concurrence, proper arrangements could be made between the two Authorities to decide on alternative procedures to allow ARC be issued by the Authority of the State of operator instead of the Authority of the State of Registry.

Other aircraft certificates/licenses (i.e. aircraft radio station license etc) will be renewed by the competent State of Registry authorities.

Article 15 - CO-OPERATION

Each Authority shall ensure that the other Authority is kept informed of all applicable standards of airworthiness, operational requirements, design-related operational requirements of its State and will consult the other Authority on any proposed changes thereto to the extent they may affect the implementation of these procedures.

Each Authority shall provide such assistance as may reasonably be required by the other Authority in its carrying out inspections, investigations and other functions in respect of the concerned aircraft.
