*This message is a result from the use of SINAPSE (<http://europa.eu/sinapse>), a web application hosted on the European Commission (EC) website, EUROPA, and of which you are a member (member of SINAPSE e-network as such or a member of an e-community hosted on SINAPSE). In addition to a standard text, the message may contain some information provided by a member. Unless otherwise explicitly stated, the material published by members in SINAPSE or transmitted via its communication tools and hosted e-communities have not been adopted or in any way approved by the Commission and cannot be considered or relied upon as a statement/view of the Commission. The European Commission does not guarantee the accuracy of this information, nor does it accept responsibility for any inconvenience which may have resulted from its delivery and use.*

Should you receive **more than one notification for the same item**, this is most likely resulting from the fact that you have more than one Sinapse profile (e.g. you are registered both as an individual member and as a member of an organisation). In this case, we recommend you to only activate the notification system in the profile for which you have chosen the widest portfolio of domains of interest/expertise.  
Should you wish to modify the notification settings (activation or frequency of the notifications) for a given community, log in Sinapse and go to the home page of the community. Click on the "Notifications" link to access the control panel and change the settings accordingly.
