A1 APPENDIX 1 - STANDARDIZATION ARRANGEMENTS FOR EXAMINER - AMC2 BFCL.430		
(1)	Limitations	(a) An examiner should allow an applicant adequate time to prepare for a test or check
		(b) An examiner should plan a test or check flight so that all required exercises can be performed while allowing sufficient time for each of the exercises and with due regard to the weather conditions, traffic situation, ATC requirements and local procedures
(2)	Purpose of a test or check	(c) Determine through practical demonstration during a test or check that an applicant has acquired or maintained the required level of knowledge and skill or proficiency
		(d) Improve training and flight instruction in ATOs or DTOs by feedback of information from examiners about items or sections of tests or checks that are most frequently failed
		(e) Assist in maintaining and, where possible, improving air safety standards by having examiners display good airmanship and flight discipline during tests or checks
(3)	Conduct of test or check	(f) An examiner will ensure that an applicant completes a test or check in accordance with Part-BFCL requirements and is assessed against the required test or check standards
		(g) Each item within a test or check section should be completed and assessed separately. The test or check schedule, as briefed, should not normally be altered by an examiner
		(h) Marginal or questionable performance of a test or check item should not influence an examiner's assessment of any subsequent items
		(i) An examiner should verify the requirements and limitations of a test or check with an applicant during the pre-flight briefing
		(j) When a test or check is completed or discontinued, an examiner should debrief the applicant and give reasons for items or sections failed. In case of a failed or discontinued skill test and proficiency check, the examiner should provide appropriate advice to assist the applicant in re-tests or re-checks
		(k) Any comment on, or disagreement with, an examiner's test or check evaluation or assessment made during a debriefing will be recorded by the examiner on the test or check report, and will be signed by the examiner and countersigned by the applicant
(4)	Examiner preparation	(l) An examiner should supervise all aspects of the test or check flight preparation, including, where necessary, obtaining or assuring an ATC clearance / liaison
		(m) An examiner will plan a test or check in accordance with Part-BFCL requirements. Only the manoeuvres and procedures set out in the appropriate test or check form will be undertaken. The same examiner should not reexamine a failed applicant without the agreement of the applicant
(5)	Examiner approach	(n) An examiner should encourage a friendly and relaxed atmosphere to develop both before and during a test or check flight. A negative or hostile approach should not be used. During the test or check flight, the examiner should avoid negative comments or criticisms and all assessments should be reserved for the debriefing
(6)	Assessment system	Although test or checks may specify flight test tolerances, an applicant should not be expected to achieve these at the expense of smoothness or stable flight. An examiner should make due allowance for unavoidable deviations due to turbulence, ATC instructions, etc. An examiner should terminate a test or check only when it is clear that the applicant has not been able to demonstrate the required level of knowledge, skill or proficiency and that a full re-test will be necessary or for safety reasons. An examiner will use one of the following terms for assessment:
		(1) A 'PASS', provided that the applicant demonstrates the required level of knowledge, skill or proficiency and, where applicable, remains within the flight test tolerances for the licence or rating
		(o) A 'FAIL' provided that any of the following apply:
		(i) the flight test tolerances have been exceeded after the examiner has made due allowance for turbulence or ATC instructions
		(ii) the aim of the test or check is not completed
		(2) (iii) the aim of exercise is completed but at the expense of safe flight, violation of a rule or regulation, poor airmanship or rough handling
		(iv) an acceptable level of knowledge is not demonstrated
		(v) an acceptable level of flight management is not demonstrated
		(vi) the intervention of the examiner or safety pilot is required in the interest of safety
		(3) A 'PARTIAL PASS' in accordance with the criteria shown in the relevant skill test appendix of Part-BFCL

A1		APPENDIX 1 - STANDARDIZATION ARRANGEMENTS FOR EXAMINER - AMC2 FCL.1015 (cont.)	
(7)	Method and contents of the test or check	(p)	<i>Before undertaking a test or check, an examiner will verify that the balloon intended to be used is suitable and appropriately equipped for the test or check. Aircraft that fall under points (a), (b), (c), or (d) of Annex I to the Basic Regulation can be used, provided that they are subject to an authorization as per point ORA.ATO.135 of Annex VII (Part-ORA) or point DTO.GEN.240 of Annex VIII (Part-DTO) to Regulation (EU) No 1178/2011.</i>
		(q)	<i>A test or check flight will be conducted in accordance with the AFM</i>
		(r)	<i>A test or check flight will be conducted within the limitations contained in the operations manual of an ATO or the operator for which the applicant is flying, as applicable, or, if available, within the limitations placed by the DTO</i>
		Contents:	
		(1)	<i>A test or check is comprised of:</i> • Oral examination on the ground (where applicable) • Pre-flight briefing • In-flight exercises • Post-flight debriefing
		(2)	<i>Oral examination on the ground should include:</i> • Balloon general knowledge and performance • Planning and operational procedures • Theoretical knowledge in the common subjects as per point BFCL.135(a)(1) in cases where the applicant receives a credit in accordance with point BFCL.140(a), based on a licence the privileges of which were not exercised for more than 2 years;
		(3)	<i>Pre-flight briefing should include:</i> • Test or check sequence • Safety considerations.
		(4)	<i>In-flight exercises will include each relevant item or section of the test or check</i>
		(5)	<i>Post-flight debriefing should include:</i> • Assessment or evaluation of the applicant • Documentation of the test or check with the applicant's FI(B) present, if possible
		(t)	<i>A test or check is intended to simulate a practical flight. Thus, an examiner may set practical scenarios for an applicant while ensuring that the applicant is not confused and air safety is not compromised</i>
		(u)	<i>N/A</i>
		(v)	<i>An examiner should maintain a flight log and assessment record during the test or check for reference during the post or flight debriefing</i>
		(w)	<i>An examiner should be flexible to the possibility of changes arising to preflight briefings due to ATC instructions, or other circumstances affecting the test or check</i>
		(x)	<i>Where changes arise to a planned test or check an examiner should be satisfied that the applicant understands and accepts the changes. Otherwise, the test or check flight should be terminated</i>
		(y)	<i>Should an applicant choose not to continue a test or check for reasons considered inadequate by an examiner, the applicant will be assessed as having failed those items or sections not attempted. If the test or check is terminated for reasons considered adequate by the examiner, only these items or sections not completed will be tested during a subsequent test or check</i>
		(z)	<i>An examiner may terminate a test or check at any stage, if it is considered that the applicant's competency requires a complete re-test or re-check</i>
