A1	APPENDIX	X 1 -	STANDARD	DIZATIO	N ARRANGEMENTS FOR EXAMINER - AMC2 FCL.1015					
	Limitations	(a)	An examiner should allow an applicant adequate time to prepare for a test or check, normally not more than 1 hour							
(1)		(b)	An examiner should plan a test or check flight so that all required exercises can be performed while allowing sufficient time for each of the exercises and with due regard to the weather conditions, traffic situation, ATC requirements and local procedures							
	Purpose of a test or check	(c)	Determine through practical demonstration during a test or check that an applicant has acquired or maintained the required level knowledge and skill or proficiency							
(2)		(d)		rove training and flight instruction in ATOs or DTOs by feedback of information from examiners about items or sections of tests or cks that are most frequently failed						
		(e)	Assist in ma discipline du		and, where possible, improving air safety standards by having examiners display good airmanship and flight or checks					
	Conduct of test or	(f)			will ensure that an applicant completes a test or check in accordance with Part-FCL requirements and is assessed equired test or check standards					
		(g)	not normally	tem within a test or check section should be completed and assessed separately. The test or check schedule, as briefed, should rmally be altered by an examiner. A failed item is not always a failed section, for example type rating skill test where a failure of n in a section does not fail the entire section, only the failed item is taken again						
(3)		(h)	Marginal or	questiona	ble performance of a test or check item should not influence an examiner's assessment of any subsequent items					
(5)	check	(i)	An examine	r should v	rerify the requirements and limitations of a test or check with an applicant during the pre-flight briefing					
		(j)		se of a fa	is completed or discontinued, an examiner should debrief the applicant and give reasons for items or sections iled or discontinued skill test and proficiency check, the examiner should provide appropriate advice to assist the re-checks					
		(k)		Any comment on, or disagreement with, an examiner's test or check evaluation or assessment made during a debriefing will be ecorded by the examiner on the test or check report, and will be signed by the examiner and countersigned by the applicant						
	Examiner preparation	(1)	An examine ATC 'slot' tin	examiner should supervise all aspects of the test or check flight preparation, including, where necessary, obtaining or assuring an C 'slot' time						
(4)		(m)		examiner will plan a test or check in accordance with Part-FCL requirements. Only the manoeuvres and procedures set out in the opriate test or check form will be undertaken. The same examiner should not reexamine a failed applicant without the agreement e applicant						
(5)	Examiner approach	(n)	or hostile ap	An examiner should encourage a friendly and relaxed atmosphere to develop both before and during a test or check flight. A negative or hostile approach should not be used. During the test or check flight, the examiner should avoid negative comments or criticisms and all assessments should be reserved for the debriefing						
	Assessme nt system		smoothness etc. An exar required leve	or stable miner sho el of knov	cks may specify flight test tolerances, an applicant should not be expected to achieve these at the expense of flight. An examiner should make due allowance for unavoidable deviations due to turbulence, ATC instructions, build terminate a test or check only when it is clear that the applicant has not been able to demonstrate the wledge, skill or proficiency and that a full re-test will be necessary or for safety reasons. An examiner will use one for assessment:					
				(1)		S', provided that the applicant demonstrates the required level of knowledge, skill or proficiency and, where ble, remains within the flight test tolerances for the licence or rating				
				A 'FAIL'	provided that any of the following apply:					
				(i)	the flight test tolerances have been exceeded after the examiner has made due allowance for turbulence or ATC instructions					
(6)		(0)		(ii)	the aim of the test or check is not completed					
			(2)	(iii)	the aim of exercise is completed but at the expense of safe flight, violation of a rule or regulation, poor airmanship or rough handling					
				(iv)	an acceptable level of knowledge is not demonstrated					
				(v) an acceptable level of flight management is not demonstrated						
				(Vi)	the intervention of the examiner or safety pilot is required in the interest of safety					
			(3)	A 'PAR'	TIAL PASS' in accordance with the criteria shown in the relevant skill test appendix of Part-FCL

A1	APPENDI	X 1 -	STANDARDIZATION ARRANGEMENTS FOR EXAMINER - AMC2 FCL.1015 (cont.)					
	Method and contents of the test or check	(p)	Before undertaking a test or check, an examiner will verify that the aircraft or FSTD intended to be used is suitable and appropriately equipped for the test or check. Aircraft that fall under points (a), (b), (c), or (d) of Annex I to the Basic Regulation can be used provided that they are subject to an authorisation as per point ORA.ATO.135 or point DTO.GEN.240					
		(q)	A test or check flight will be conducted in accordance with the AFM and, if applicable, the AOM					
		(r)	A test or check flight will be conducted within the limitations contained in the operations manual of an ATO or the operator for white applicant is flying, as applicable, or, if available, within the limitations placed by the DTO					
		(s)	Contents:					
			A test or check is comprised of:  Oral examination on the ground (where applicable) Pre-flight briefing In-flight exercises Post-flight debriefing					
			Oral examination on the ground should include:  1. Aircraft general knowledge and performance 1. Planning and operational procedures 2. Other relevant items or sections of the test or check.					
(7)			Pre-flight briefing should include:  (3)  • Test or check sequence • Power setting, speeds and approach minima, if applicable • Safety considerations.					
			(4) In-flight exercises will include each relevant item or section of the test or check					
			Post-flight debriefing should include:  • Assessment or evaluation of the applicant • Documentation of the test or check with the applicant's FI present, if possible					
		(t)	A test or check is intended to simulate a practical flight. Thus, an examiner may set practical scenarios for an applicant while that the applicant is not confused and air safety is not compromised  When manoeuvres are to be flown by sole reference to instruments, the examiner should ensure that a suitable method of is used to simulate IMC					
		(u)						
		(v)	An examiner should maintain a flight log and assessment record during the test or check for reference during the post or flight debriefing					
		(w)	An examiner should be flexible to the possibility of changes arising to preflight briefings due to ATC instructions, or or circumstances affecting the test or check					
		(x)	Where changes arise to a planned test or check an examiner should be satisfied that the applicant understands and a changes. Otherwise, the test or check flight should be terminated					
		(y)	Should an applicant choose not to continue a test or check for reasons considered inadequate by an examiner, the applicant will be assessed as having failed those items or sections not attempted. If the test or check is terminated for reasons considered adequate by the examiner, only these items or sections not completed will be tested during a subsequent test or check					
		(z)	An examiner may terminate a test or check at any stage, if it is considered that the applicant's competency requires a complete re-tes or re-check
