

This architectural site plan illustrates a parking lot layout with several key features:

- Parking Stalls:** A series of yellow-outlined rectangular stalls are arranged in a row, with arrows indicating a one-way flow from left to right.
- Loading/Unloading Zones:** Four orange-outlined rectangular areas are designated for vehicle activity. One of these zones is labeled "Zona di carico/scarico".
- Traffic Flow and Markings:** The plan includes various road markings such as dashed lines, solid lines, and arrows to guide vehicle movement. A "STOP" sign is located near the intersection on the right.
- Surrounding Infrastructure:** The parking area is bordered by buildings on the left and top, and a road with a "STOP" sign and pedestrian crossings on the right. A green hatched area at the bottom is labeled "T.F.". A blue arrow points towards the bottom right corner.
- Other Details:** The plan shows building footprints, windows, doors, and landscaping elements like trees and shrubs. A small black dot is visible in the bottom right area.

Area di cantiere
