Genoa Airport and Quality

Commitment to Quality 5>

The commitment of C. Colombo Airport to Quality

Dear User,

Aeroporto di Genova S.p.A. is committed to offering its passengers efficient services and a comfortable and functional infrastructure every day. Our Management Company has as its main objective the improvement of the services offered to users, both directly and indirectly, thus ensuring high standard for security, quality, and environmental respect.

The purpose of this publication is to define the commitments and the standards for the services offered and to improve the relationship with our suppliers and users; the 2024 Service Charter demonstrates our commitment.

The Service Guide, attached to this Service Charter, contains practical information on the airport and the location of the services available at the Terminal. The Guide will help you find your way when travelling.

I would like to inform you that major modernisation and expansion works are underway at the terminal, which will be completed after the summer of 2024. We apologise in advance for any inconvenience caused by this work, which will lead us to have a larger, more comfortable and more welcoming airport within the next few months.

At the end of this brochure you will find a card that can be used to send us your suggestions or make a complaint. You can contact us also via email at ufficio reclami@airport.genova.it, writing a message through a dedicated form on our site www.aeroportodigenova.it, through official Facebook page "Aeroporto di Genova" or on our Twitter account @genovaeroporto.

Aeroporto di Genova S.p.A.

It is the Management Company which has as its objective the administration and management of airport facilities as well as the coordination and control of the activities of the private operators present in the airport system of C. Colombo Airport, under constant supervision of the Ente Nazionale per l'Aviazione Civile (ENAC, Italian Civil Aviation Authority) as per comprehensive concession by Special law and ENAC convention no. 22 of 30/04/2009.

The Company, as Operator, obtained the IT.ADR.0024 Airport Certificate, issued on 18/12/2017, which certifies the compliance of the infrastructure, organization and operating procedures with EU Reg. 139/14. As part of the concession regime, it carries out the organization and management of all retail activities in the airport area, through sub-concession agreements. As a handler it obtained the Certificate of Eligibility no. 160, as provider of airport ground handling services.

In 2020, the terminal extension project and the modernisation of the existing air terminal were approved by ENAC, which will result in a substantial increase in the areas dedicated to passengers and an expansion of the baggage handling system, in addition to a significant improvement in passenger service levels. Work started in 2022 and will be completed immediately after the summer of 2024. Renovation work on the existing terminal will begin in the winter of 2024 to ensure the modernisation and architectural continuity of the facility.

About Aeroporto di Genova S.p.A.

The Airport is located about 9 km from the city centre and may rely on a catchment area of about 3.2 million inhabitants within 60 minutes of driving time, in a territorial context with a large number of important manufacturing industries, companies specialised in tourism, near the marina "Marina Aeroporto" and, more in general, in the centre of a municipal area subject to major redevelopment and transformation actions.

The Company's mission may be summarised into the following objectives:

- > Management and development of airport infrastructures.
- > Coordination and supervision of hub operations.
- > Provision of ground handling services.
- > Promotion and development of air connectivity and commercial services for travellers.
- > Provision of security and safety services.

The shareholder base of Aeroporto di Genova S.p.A. is divided into Autorità di Sistema Portuale (port system authority) of western Ligurian Sea (60%), the Chamber of Commerce of Genoa (25%), and Aeroporti di Roma S.p.A. (15%).

Aeroporto di Genova S.p.A. provides its services in conformity with some key principles.

Equality and impartiality

The airport Operator guarantees full accessibility to airport infrastructures and services to all passengers, irrespective of their nationality, sex, religion, origin, or language. At the same time, it ensures the use of services also by passengers requiring specific forms of assistance (the disabled, elderly, children).

Continuity

Aeroporto di Genova S.p.A. guarantees the continuity of the services for which it is responsible. The Company undertakes to define the scope of the minimum services provided in the event of a strike or other acts of God and to give prompt notice through all media available to it.

Engagement

Aeroporto di Genova S.p.A. guarantees the engagement of users through consultation initiatives, carried out by independent and specialised organisations, in order to measure the level of customer satisfaction in accordance with objective criteria.

Improvement

Aeroporto di Genova S.p.A. defines its development policies, the design, production and offering of services with a view to continuous improvement in response to the needs of its users and the technological evolutions.

Our commitment to the environment and development

Respecting the environment is always a priority for Aeroporto di Genova S.p.A.. For this reason, in 2023, the Company continued to pursue the activities already identified in previous years and included in the Environmental Protection Plan agreed with ENAC.

Consuming less to reduce environmental impact

The main objective identified in previous years and pursued with a series of initiatives, partly completed and partly still ongoing, is to reduce airport energy consumption, with particular reference to power consumption, which accounts for over 80% of the total.

Specifically, during 2023, work continued on the replacement of lighting systems (indoor and outdoor) with LED equipment and the following activities scheduled to begin in 2024 were initiated that will continue for the next four years: Re-lamping of all fingers with the installation of LED equipment, replacement of AHUs on the arrivals floor, and the installation of a photovoltaic system to minimise energy demand from outside.

Together, these measures will ensure further positive effects that will lead to a substantial decrease in expected energy consumption.

Our commitment to the environment

Commitment to Quality

9>

The challenge of separate collection

The separate collection of waste comparable to municipal solid waste continues thanks to the presence of appropriate signs, furnishings, and information and communication campaigns also shared with sub-contractors.

The other monitoring activities provided for in the relevant Plan annexed to the Environmental Compatibility Decree - which the airport's operations adhere to - also continued in 2023.

These control activities refer to surface discharges, gaseous emissions caused by workshops, noise caused by airport activities, birdlife, special and hazardous waste management.

A quieter and non-polluting airport

Following the final approval obtained in 2019 for the update of the airport acoustic zoning by the Airport Commission pursuant to Articles 5 and 6 of Italian Ministerial Decree 31/10/97 and the planned surveys on noise and air quality were carried out during 2023 as well.

The data obtained confirmed the results of previous years, in terms of observance of the set limits and the total absence of any major acoustic impact on residential areas.

Our commitment to the environment

An airport undergoing transformation

In 2023, important development and modernisation work continued at the airport, in accordance with the planning foreseen in previous years.

During 2023, work continued on the expansion and renovation of the passenger terminal. The foundations of the building, the decks and the entire steel structure were erected in preparation for the construction of the slabs. Then the concrete was poured and the two floors of the new area were built. In addition, the tower for the new boarding gate and the structure of the new connection between the terminal and the tower itself were built.

The works will continue, according to a detailed programme by stages, until autumn, 2024, ensuring the return to operation of the various areas as soon as they are completed in order to offer an increasingly high level of service to passengers.

At the same time, the actual execution of the works could lead to a marginal degree of inconvenience to travellers, in terms of available spaces and limited services. As was already the case for other minor interventions in the past, Aeroporto di Genova SpA will strive to limit such inconveniences as much as possible and guarantee effective supervision of the activities, taking into due consideration travellers' needs and the regularity of operations.

Service Charter

SERVICE CHARTER CONTENTS

Quality indicators	12
Travel safety	12
Service regularity and punctuality	13
Cleanliness and hygiene	13
Comfort of stay at airport	14
Additional services	14
Information for customers	15
Counter/gate services	16
Modal integration	16
Services for passengers with disabilities or reduced mobility	17
Waiting times for departing passengers	18
Arriving passenger waiting times	18
Perception of the service provided	19

Quality indicators

The tables below contain the quality and quantity parameters required in the Service Charter of the Airport Operator, in accordance with the ENAC – GEN 06 methodology.

The Service Charter features 34 indicators that are grouped into 10 “quality factors”, together with 16 indicators dedicated to the passengers with reduced mobility. In general, satisfaction for Aeroporto di Genova services is positive with an overall ranking of “excellent” (equal to 100%).

With regard to quantity performances, check-in waiting time improved compared to the previous year, as did waiting times for the first and last baggage.

The tables show:

- The first column shows the indicators identifying the level of passenger satisfaction or the level of the service provided.

- The second column presents the measurement unit.
- The third column contains the result for 2023.
- The fourth section presents the target for 2024.

Sample survey of 801 respondents.

Customer satisfaction is measured through personal “face to face” sample interviews on a scale of 5 degrees of appreciation: excellent, good, average, poor, and unsatisfactory.

Objective data, check-in waiting time, security controls, passport control, waiting time on board for first passenger disembarkation, time for PRMs at departure and arrival are gathered from specific measurements by using company’s tablets and databases as required by the Quality System used by Aeroporto di Genova S.p.A.

Travel safety

The passenger’s perception of travel safety still ranks as fully satisfactory with a 100% performance.

Indicator	Measurement unit	2023 result	2024 target
Overall perception of the security control service of people and hand baggage	% satisfied passengers	100%	99%
Overall perception of personal and property security at the airport	% satisfied passengers	100%	99%

Service regularity and punctuality

Regularity and punctuality of airport services improved compared to the previous year, although overall flight operation continued to be affected by flight delays from the most congested hubs.

Time of return of first and last item of baggage improved compared to times recorded in 2022 thanks to the process correction and monitoring actions implemented by the Operator in cooperation with the service provider.

Indicator	Measurement unit	2023 result	2024 target
Overall flight punctuality	% of flights on time/ Total departing flights	53.08 %	70%
Total baggage mislaid at departure (baggage not boarded) for which the hub is responsible	No. items of baggage mislaid/1,000 departing passengers	0.25 ‰	0.25‰
Time for reclaim of the 1st item of luggage from the block-on of the aircraft	Waiting time in minutes calculated in 90% of cases	09'53"	12'00"
Time for return of the last item of baggage from the block-on of the aircraft	Waiting time in minutes calculated in 90% of cases	11'33"	15'00"
Waiting time on board for the disembarkation of the first passenger	Waiting time in minutes from B.O. in 90% of cases	2'13"	03'30"
Overall perception of the regularity and punctuality of services received in the airport	% satisfied passengers	100%	98%

Cleanliness and hygiene

The satisfaction for terminal and toilet cleanliness confirms positive results also for 2023.

Indicator	Measurement unit	2023 result	2024 target
Perception of the level of cleanliness and function of the toilets	% satisfied passengers	98%	96%
Perception of the level of cleanliness of air terminal	% satisfied passengers	99%	97%

Comfort of stay at airport

Passengers were fully satisfied with the overall comfort of the airport despite the construction sites within the terminal. The elimination of the staircase in the departure hall that gave access to the second floor and the replacement of the railings with glazed panels that gave more space and lightness to the hall certainly had a positive effect.

Indicator	Measurement unit	2023 result	2024 target
Perception of availability of trolleys	% satisfied passengers	100%	98%
Perception of the efficiency of passenger transfer systems (escalators, lifts, people movers, etc.)	% satisfied passengers	100%	97%
Perception of the efficiency of air conditioning systems	% satisfied passengers	100%	97%
Perception of the overall level of comfort of air terminal	% satisfied passengers	99%	97%

Additional services

Satisfaction with air terminal Wi-Fi, a service in high demand and appreciated by passengers, recorded excellent performances in 2023. The mobile phone/laptop recharging service (a need increasingly felt by passengers), was much appreciated following the implementations made during the year.

With reference to the availability of shops and drink and snack vending machines, the data confirm the need to finalise the terminal expansion in order to meet users' needs for a greater offer and type of commercial products (thanks to the new 5,000 sq m area). Work is scheduled to be completed in autumn 2024.

Indicator	Measurement unit	2023 result	2024 target
Perception of Wi-Fi connectivity inside the air terminal	% satisfied passengers	100%	96%
Perception of the availability of mobile phone/ laptop recharging stations, in common areas,	% satisfied passengers	100%	91%
Bar Opening/Airport Opening	in the respective areas	100%	99%
Perception of the adequacy of smokers' rooms, if any	% satisfied passengers	N.A.	N.A.
Perception of the availability of free drinking water dispensers, if any	% satisfied passengers	N.A.	N.A.
Perception of the availability / quality / pricing of shops and newsagents	% satisfied passengers	86%	86%
Perception of the availability / quality / pricing of coffee bars and restaurants	% satisfied passengers	75%	89%
Perception of the availability of drink/snack vending machines, if any	% satisfied passengers	96%	97%

Information for customers

The overall perception of the effectiveness and of the accessibility of information systems for the public confirms excellent levels.

Indicator	Measurement unit	2023 result	2024 target
Easy to view and updated website	% satisfied passengers	94%	96%
Perception of the effectiveness of operational information points	% satisfied passengers	100%	97.5%
Perception of the clarity, ease of understanding and effectiveness of internal signs	% satisfied passengers	100%	98%
Perception of personnel professionalism (info points, security)	% satisfied passengers	100%	98%
Overall perception of the effectiveness and of the accessibility of information services for the public (monitors, announcements, internal signs, etc.)	% satisfied passengers	100%	98%

Counter/gate services

Satisfaction and waiting times at check-in recorded excellent results and waiting times at security checks also improved.

Indicator	Measurement unit	2023 result	2024 target
Perception of ticketing service	% satisfied passengers	96%	96%
Check-in waiting time	Waiting time in minutes in 90% of surveyed cases	09'22"	12'00"
Perception of check-in waiting time	% satisfied passengers	98%	97%
Security control waiting time	Waiting time in minutes in 90% of surveyed cases	05'12"	05'40"
Perception of waiting time at passport control	% satisfied passengers	100%	97%

Modal integration

The C. Colombo Airport lies about 9 km from the city centre and is served by both road connections and public transport. Satisfaction with the links between the airport and the city centre increased in 2023. The perception of external signs remained at good levels despite the presence of construction sites in the external areas which led to changes to the road network and external areas.

Indicator	Measurement unit	2023 result	2024 target
Perception of the clarity, ease of understanding and effectiveness of external signs	% satisfied passengers	100%	98%
Perception of the adequacy of city/airport connections	% satisfied passengers	99%	95%

Passengers with reduced mobility

The support service for passengers with reduced mobility has confirmed excellent satisfaction levels in 2023 and the perception of the service offered continues to show extremely positive data regarding personnel kindness and professionalism. The training of PRM Assistance operators is updated on an ongoing basis in compliance with the requirements of Reg. (EC) 1107/2006.

Indicator	Measurement unit	2022 result	2023 target
Perception of the condition and function of the resources/equipment supplied	% satisfied PRMs	100%	98%
Perception of the adequacy of personnel training	% satisfied PRMs	100%	98%
Accessibility: quantity of essential information accessible to the visually, hearing and physically impaired with respect to the total quantity of essential information	% essential information accessible out of total quantity of essential information	100%	98%
Completeness: quantity of information and instruction, regarding the services offered, available in accessible format in the total quantity	% information/instruction, relative to the service in accessible format out of total quantity of information/instruction	100%	98%
Perception of effectiveness and accessibility of information, communications and signs inside the airport	% satisfied PRMs	100%	98%
Number of responses supplied within the time established with respect to the total number of requests for information received	% responses supplied within the time established out of total number of requests	100%	98%
Number of complaints received with respect to total traffic of PRMs	% complaints received out of total traffic of PRMs	0%	0,01%

Waiting time of departing passengers

Outside the air terminal, close to the entry doors on the arrivals and departures levels, a video intercom station is installed to call the personnel to request assistance. Similarly, PRMs arriving straight at the stalls dedicated to them can telephone for assistance directly as specifically indicated by the signs. The intervention times recorded at such points were 06'58" for booked PRM and 07'33" for unbooked PRM.

Booked PRMs	2023 result	2024 target
Waiting time in minutes in 90% of cases	06'58"	10'00"
NON-booked PRMs	2023 result	2024 target
Waiting time in minutes in 90% of cases	07'33"	11'00"

Waiting time of arriving passengers

Booked PRMs	2023 result	2024 target
Waiting time in minutes in 90% of cases	1'45"	3'00"
NON-booked PRMs	2023 result	2024 target
Waiting time in minutes in 90% of cases	1'45"	4'00"

Perception of the service provided

Indicator	Measurement unit	2023 result	2024 target
Perception of the effectiveness of PRM assistance	% satisfied PRMs	100%	98%
Perception of the level of accessibility and usability of the airport infrastructures: car park, intercoms for calling staff, dedicated rooms, toilets, etc.	% satisfied PRMs	100%	98%
Perception of dedicated spaces for use by PRMs (e.g., Amica lounge)	% satisfied PRMs	100%	96%
Perception of the courtesy of staff (info point, security, dedicated staff for special assistance)	% satisfied PRMs	100%	98%
Perception of the professionalism of the dedicated staff for the supply of special assistance to PRMs	% satisfied PRMs	100%	98%

Transport to C. Colombo Airport

Situated just 9 kilometres away from the centre of Genoa, the Cristoforo Colombo Airport is the reference hub for Liguria and Lower Piedmont.

On the motorway:

The air terminal has a direct link to “Genova Aeroporto” toll station through a junction that is separate from urban viability with respect to the directions:

- A10 “dei fiori” (Savona-Ventimiglia),
- A26 “dei trafori” (Alessandria-Turin-Milan).
- A7 “Serravalle” (Alessandria-Milan),
- A12 (La Spezia-Livorno-Rosignano).

MAIN ROAD DISTANCES (km)

Sanremo	140

Urban road network

Genoa Airport is integrated in the urban road network and is approx. 9 km from the city centre, where you can also find the maritime station, the railway station of Genova Piazza Principe, the Aquarium and the Old Port.

Travelling along the coastal road and the flyover, you can easily reach the eastern quarters, where the International Trade Fair and Genoa Brignole railway station are situated.

Arrival at airport by Train and by Bus

The nearest railway station is that of "Genova Sestri Ponente Aeroporto", which can be reached with AMT "Airlink" shuttle: the circular shuttle bus stop is seaside at the station and can be reached via a suitably marked footpath. It runs about every 15 minutes. Travel time is about 5 to 10 minutes.

All season tickets and integrated AMT/Trenitalia tariffs are accepted on board (ordinary ticket fare 100 minutes €2; ordinary integrated ticket 100 minutes AMT/Trenitalia €2.20, Met Daily ticket from €10 valid 24 hr).

The Airlink service can also be used with a train ticket with origin/destination "Genova Aeroporto C. Colombo" (only for travel to/ from stations outside the metropolitan area of Genoa).

The running times of the Airlink service are **15 minutes**, between 6:00am to 10:00pm.

Tickets for all Trenitalia services can be purchased from the automatic ticket machine on the arrivals level of the air terminal building.

For information on train times, contact the **call center 892012** (from Italy) or **+39 0668475475** (from abroad), visit the website **www.trenitalia.com** or use the **Trenitalia App**.

Arrival at airport by Train and by Bus

VOLABUS

Genoa airport is also connected to the city's main railway stations, **Genova Brignole** and **Genova Principe**, with links to the most important areas in Liguria and its neighbouring regions. This public service that is supplied by the municipality-owned AMT and whose name is Volabus, is operated with comfortable Gran Turismo coaches.

Aeroporto > Centro Città
Airport > City Centre

To use the Volabus you can use the MET DAILY ticket, valid for 24 hours, which allows you free circulation on the entire AMT network (urban and extra-urban), including Navebus, Ferrovie Genova Casella and Portofino line 782.

BUSINESS HOURS

PASSENGER AIR TERMINAL

The air terminal is structured over four levels and can accommodate a flow of 1,500 passengers per hour. Starting in September, new areas will be released but at the same time renovation work will begin on the current Terminal; therefore the hourly flow for 2024 will remain unchanged. Five mobile boarding bridges are available for boarding and disembarking. As of autumn 2024, the new security control area, new commercial areas and a sixth pier for passenger boarding will be delivered.

GENOVA AIRPORT FREE WI-FI

Free Wi-Fi is available throughout the passenger air terminal; connect to the network and follow registration instructions.

TRAVEL ADVICE

If you are about to start a long journey carefully choose the objects you wish to bring with you. Please find some hints below:

- The air conditioning aboard the plane may be uncomfortable. Do not forget to carry a pullover or sweater, and if you wear contact lenses also bring your artificial tears with you.
- At security check-points you will be required to remove your laptop, tablet and the bag containing your liquids: make sure they are stored in an easily accessible place to save precious time.
- In the event of long-haul flights it may be appropriate to bring toothbrush and toothpaste (in the liquids bag) and possibly a change of clothes.

Restrictions on the network and security usage and on the amount of data traffic are indicated

Connect to
“Airport Free Wi-Fi”
network and sign in!

Autism: travelling through the airport

Autism: travelling through the airport

Booking a flight, getting to the airport, getting on a plane: these are simple and natural things for millions of travellers. For people with autism spectrum disorders, however, air travel presents a challenge. The project "Autismo, in viaggio attraverso l'aeroporto" (Autism: travelling through the airport), promoted by ENAC, intends to make air travel easier and more pleasant for people with autism and their travelling companions, if any. The project involves cooperation with Assaeroporti, an association of airport management companies, and was made possible thanks to the participation of numerous airports and associations of people with autism. Aeroporto di Genova SpA joined this project enthusiastically, relying on the cooperation with the ANGSA Onlus associations, Associazione Nazionale Genitori Soggetti Autistici, and Gruppo Asperger Liguria, and drawing on the experiences of the other airports promoting this initiative.

BEFORE THE FLIGHT

When booking a flight, whether at the travel agency, on the airline's website or through a tour operator, (and in any event at least 48 hours before the flight) it is possible to request passenger assistance. This request will then be forwarded to the arrival and departure (and possibly transit) airports, which will provide the service. The request for assistance must state the needs of the person with autism.

TRAVEL PREPARATIONS

Airports are places where hundreds of people come and go, with sometimes invasive lights and sounds that can make the travel experience difficult for people with autism. For this reason it is advisable to prepare in advance before travelling:

- By explaining what the trip will involve and talking through the steps
- By showing photos and videos of the airport, so they know what to expect
- By reassuring and emphasising the presence of friendly staff and dedicated spaces.

VISITING THE AIRPORT BEFORE THE FLIGHT

The "Autismo, in viaggio attraverso l'aeroporto" project offers the option to visit the airport terminal before travelling. Visiting the airport is a way to familiarise oneself with the spaces, colours, lights and sounds without the anxiety of imminent departure. It is possible to request a visit to the airport terminal by writing an e-mail at least 48 hours before the flight to:

autismo@airport.genova.it

All the information and the flyer dedicated to the project "Autismo, in viaggio attraverso l'aeroporto" are available at **<https://www.airport.genova.it/autismo/>**

Services for passengers with disabilities and reduced mobility

Genoa Airport is committed to meeting the needs of disabled users. The personnel assisting the passengers with reduced mobility is trained in appropriate courses on awareness-raising and service qualification. They also have gained many years of experience. The personnel attend refreshments training every year in order to understand and respond as promptly and as professionally as possible to the various passengers' needs.

To receive assistance

The request for assistance and the special needs of the passenger with disability or reduced mobility must be notified to the carrier, its agent, or the tourist operator, at the time of booking or at least 48 hours before flight departure. The carrier will be responsible for forwarding request to the airport concerned. On the day of departure show up at one of the contact points of the airport, within the timeframes stated by the airline. Notify your presence to receive assistance.

Dedicated services

The air terminal is provided with the following:

- In the central car park, situated 50 metres from the air terminal, 20 free car parking spaces are reserved for the cars of disabled passengers. The cars must be identifiable with the visibly displayed badge.
- Outside the air terminal, close to the entry doors on the arrivals and departures levels (ground floor and 1st floor), a colour-video intercom station is installed to call the personnel. In addition, there is a short-stay stall for passengers with disabilities or those with reduced mobility.

- On the arrivals level of the air terminal a tactile footpath is available for the visually impaired. On the arrivals level at the air terminal an interactive kiosk is provided as the designated point of arrival for passengers with reduced mobility.
- The departures level of the passengers' air terminal includes a tactile footpaths for the visually impaired that extend into the external viability and ensure, including through tactile maps, easy access to the Genova Lounge. Here the visually impaired can check-in and access, if they so wish, the Sala Amica Lounge. Next to the security control area a dedicated room is available for disabled passengers.
- Sala Amica Lounge for passengers who need assistance.
- Accessible toilets.
- Internal and external lifts to access upper floors provided with buttons with "braille" text and voice announcements.
- Pavements with access ramps.
- An elevating platform is available to facilitate boarding the aircraft.
- Security control gates are equipped both for passengers on wheelchair and with pacemakers.

Passengers travelling on a stretcher or wheelchair must make their reservation at least 36 hours prior to departure through the carrier (offices or call centre). The carrier will then confirm the required service. Passengers on stretchers must also be assisted by a (paying) adult passenger both on the ground and during the flight.

Reception and security lounge at airport

In order to perform check-in operations within the time limit set by carriers and allow the performance of embarkation and security procedures within the scheduled timetables, all passengers are advised to show up at least 60 minutes to perform check-in operations.

Documents

We recommend checking in advance with the airline for any documents required for your journey. In general, at check-in and boarding gate a valid ID card (identity card or passport) must be exhibited. Your boarding card must be exhibited at security check points.

Travelling minors

The minor traveller must carry their own valid document (identity card or passport). For more information on the compulsory documents for any children travelling or travel documents visit the website www.poliziadistato.it. For unaccompanied children please check with your airline for the required procedure.

Pregnant women

At the time of booking it is advisable to check the transport rules laid down by the airline; normally a medical certificate is requested.

Hand baggage

Only one item of hand baggage may be taken into the cabin. The hand baggage must be provided with an appropriate tag with the owner's details and its weight and size may be different for each carrier (enquire with your airline about the weight and dimensions permitted for your baggage). If the baggage exceeds the required allowance, it may be transported as long as the "excess" fee is paid at the ticket office.

Except for specific restrictions applied by your carrier, one of the following items may be carried in addition to your hand baggage:

- A handbag or a document holder or a laptop PC
- A camera or video camera or CD player
- A coat or a raincoat
- An umbrella or walking cane
- A pair of clutches or other walking aids
- A portable cot and baby food
- A buggy
- Reading items for the journey
- Items purchased at the Duty Free and other airport shops (limited quantity and weight)

After reaching the terminal, carefully read the publicly displayed regulations or go to check-in desks to enquire about the hand baggage safety measures in force.

Items that are not permitted in the hand baggage

- All items that are not permitted in the hold baggage
- Objects with pointed tips and a cutting edge (scissors, knives, nail files, razor blades, screwdrivers, cutlery, letter openers, sewing needles, miscellaneous tools)
- Blunt objects of any type
- Toy weapons
- Electronic devices with paralysing and neutralising effect through electric shock
- Liquid and semi liquids, gels, creams, pastes and similar items, except for a maximum volume of 1,000 ml carried in containers of 100 ml each, in the dedicated transparent and sealable bag.

It is forbidden to leave your baggage unattended and carry packets or hold baggage on behalf of other passengers.

Pesto sauce in your hand baggage

Fly from Genova and carry the pesto sauce in your hand baggage, even if the jar exceeds 100 ml. **You just have to collect a sticker to be placed on the jar, donating 50 cents, in order to help a child suffering from a severe pathology to fly towards a hospital capable to heal him/her.** This is an initiative by Aeroporto di Genova and ASCOM for the Flying Angels Onlus Foundation that was successfully implemented with the contribution of the North West Department of ENAC (Ente Nazionale per l'Aviazione Civile, Italian Civil Aviation Authority). All passengers may carry in the hand baggage one or more pesto sauce jars in exchange for a small donation to **Flying Angels Onlus**. The rules for benefitting from this service are very simple:

- all departing passengers are allowed to carry in their hand baggage a jar of up to 500 grams of pesto sauce or two jars of up to 250 grams (maximum diameter is 15 centimetres and maximum height 20 centimetres) controls and then returned to the passenger.

Liquids

No liquids and/or similar substances may be carried in the hand baggage, except for the possibility to carry in a dedicated transparent sealable bag, containers holding 100ml or less, for a total of 1 litre (1,000ml) per passenger. The bag must be submitted separately from the hand baggage at security check points.

- Each jar may pass through security controls, as long as a sticker with the wording "Il pesto è buono" (Pesto is good) is affixed to it. The sticker can be obtained by donating at least 50 cents either at the store of purchase or at the airport ticket office (all donations will support Flying Angels Onlus)
- At security checks, the passenger will have to remove the jars from the hand baggage and place them aside in the tray, informing the security personnel
- The jars will be subject to security controls and then returned to the passenger.

WARNING: this procedure only applies to direct flights from Genoa Airport. In the event of stopovers, the jar must be placed in the hold baggage. This procedure only applies to jars containing "Genovese pesto sauce". Other products are excluded.

All information available on www.airport.genova.it/pesto

Quantities larger than 100 ml are permitted in the hand baggage at all EU airports for the following items: medicines, dietary food and/or baby food that are necessary during the flight. You are allowed to carry any liquids, aerosols, and gels purchased on board the aircraft or at the airport - airside - as long as they are sealed by the seller and accompanied by a till or sales receipt acting as proof of the point of sale.

Medical devices

We recommend checking in advance with the airline for any rules on carrying medical devices or medicines for the treatment of specific conditions. Passengers with pacemakers fitted are required to exhibit their certification and inform security control officers in advance.

Hold baggage

We recommend checking in advance with the airline for any rules on carrying the hold baggage. Baggage must not exceed the number and weight permitted based on the service class and as stated on the ticket. Any baggage exceeding the required allowance may be transported as long as the "excess baggage" fee is paid at the ticket office. All items of baggage must display name, address and phone number. It is forbidden to leave your baggage unattended during your stay at the airport.

Items that are not permitted in the hold baggage

- Explosives, ammunition, firearms, fireworks, any pyrotechnic materials
- Compressed (flammable and non-flammable) gases
- Flammable substances
- Infectious and poisonous substances
- Corrosive and oxidant substances
- Radioactive substances
- Magnetic materials
- Alarm devices
- Underwater torchlights with batteries
- Personal defence spray

You are advised against placing electronic devices with lithium batteries in the hold baggage.

It is forbidden to leave your baggage unattended while staying at the airport.

Oversize baggage

Passengers are advised to check in advance with the airline with regard to restrictions for the transport of oversized baggage items and how these should be packed.

Transporting firearms and ammunition

We recommend checking in advance with the airline for any rules it applies to this respect.

In general, firearms documents must be submitted at the time of check-in. A form must be completed and handed over to the Police office (arrivals level after security check-points) for the necessary authorisations. The service for weapon transport may be subject to a fee.

DID YOU KNOW...

facts on lithium batteries

<p style="font-size: small;">that your phone, laptop, and other electronic devices contain lithium batteries?</p>	<p style="font-size: small;">that lithium batteries and e-cigarettes are dangerous goods?</p>	<p style="font-size: small;">that if lithium batteries are damaged or short circuited they can start a fire?</p>	<p style="font-size: small;">Do not put them in your checked-in luggage</p> <p style="font-size: small;">Carry them with you</p>
---	---	--	--

Your safety depends on You too

Per saperne di più consulta le informazioni fornite dalla tua compagnia aerea sulle merci pericolose

Small animals

These can travel in the cabin in a suitable container with waterproof and absorbent bottom. The total weight, including the cage, must not exceed 8 or 10 Kg, depending on the airline. Booking is required and must be confirmed by the carrier concerned.

Large animals

These must travel in the hold (pressurised, lit and heated) in a suitable container (the animal must be able to stand, turn around and drink). Booking must be made in advance and confirmed by the carrier concerned.

You are advised to check with the travel agency or airline for any animal transportation arrangements, the availability of containers and any medical documents required. A supplement must be paid directly at the airport ticket offices for animals travelling with a passenger.

Animals in the hold

Travelling in the hold is always stressful for animals. Airport personnel will look after your four-legged friend with utmost care. Write down their name on the cage so the personnel can call them by name and calm them down.
